

Sr. Mobile Application Developer

Mobile Knowledge Systems Inc, , a dominant player in the dispatch, interactive mobile media and point of sale space, headquartered in Ottawa, Canada, is seeking a **Sr. Mobile Application Developer**. This is a full time position based in Ottawa, Canada.

The primary responsibility of this position involves design, development, testing and implementation of key mobile applications within the transportation industry.

PRINCIPAL RESPONSIBILITIES:

1. Architect and develop engaging mobile applications for iOS and Android
2. Work with a team of other developers and designers, providing guidance and feedback to other team members throughout all phases of a project
3. Solve problems at both the product and code level
4. Provide and maintain up to date, thorough documentation for all responsible systems, processes and issues. Provide second and third tier support and written documentation for users and applications as needed.
5. Estimate projects with the confidence and ability to meet your estimates
6. Recommend policy, procedure and process changes to firm's decision makers. Research and evaluate new software, hardware and technological resources. Ensure the firm is up-to-date with current industry security, standards and practices.

QUALIFICATIONS:

1. 2+ years of experience with building production Android/iOS apps using Java/Swift/Objective-C
2. 4+ years of experience in software development
3. Experience using Xamarin a strong plus
4. Strong proven expertise in native Android and/or iOS development frameworks (API, testing, deployment, etc.)
5. Proven record in shipping mobile apps to iOS and Android stores
6. Experience interacting with RESTful JSON web services
7. Experience seamlessly implementing 3rd party libraries
8. Knowledge of mobile OS-specific design patterns and experience building sleek, high performance, native user interfaces
9. Experience using project/bug tracking tools and source control
10. Ability to multi-task effectively on several projects
11. Understanding of the mobile development lifecycle
12. Results oriented, product focused, and at ease in an environment requiring the ability to quickly and appropriately prioritize conflicting demands
13. Strong analytical and excellent verbal and written communications skills
14. Team player eager to work closely with, learn from and mentor others while continually improving self and team
15. Innately curious about new technologies and their practical application
16. Flexibility and willingness to pitch in and wear more than one hat in a dynamic organization
17. BS/MS in CS or equivalent engineering discipline
